

1000 FT WHITE CAT6 COMMERCIAL GRADE NETWORK CABLE

With voice, data and security capabilities, our Cat6 bulk cable is ideal for network installation, camera installation or more. Foot-marked cable is packaged in an easy-to-pull box for easier installation.

Cat5e vs. Cat6

Although Cat5e also supports a gigabit network, Cat6 features more stringent specifications to fight crosstalk and system noise. Crosstalk is the interference that happens inside the cable between the four twisted pairs of conductors that are wrapped around each other. System noise is the interference (usually EMI, or, electromagnetic interference) from the environment. This can come from power lines, office fluorescent lights, microwaves, etc. Cat6 features a more robust gauge that protects you from such problems
